PROFESSIONAL PROFILE

Committed, versatile Full Stack JavaScript Developer acknowledged for impact in software development, database development and administration, test engineering and management, test infrastructure development and maintenance, cross-departmental collaboration, and business/technical liaison

TECHNICAL SKILLS

While I have experience in multiple languages, I'm most drawn to JavaScript and its surrounding technologies. Its functional nature seems very intuitive to me. My experience in JavaScript, of course, extends to various libraries/frameworks (AngularJS, React.js, jQuery, Express.js) and other related technologies (Node.js, HTML, CSS, Bootstrap). I'm also well versed in SQL and NoSQL databases and have a good amount of experience and enjoy coding in C#. Take a look at my portfolio (address above).

THE GAP

Following my last SDE position my family was hit with a series of issues we needed to attend to. I decided to take a bit of a break to refresh and possibly change my development focus. Then COVID happened and I became the primary caregiver for our son while my wife was able to work through all but the worst of the pandemic. I did explore game development during this time, mostly with Unity and Unreal Engine. As school has gone back to in person instruction I've had the time to focus on getting my skills back to where they need to be. Take a look at my portfolio (address above) to see some past projects and the one I'm currently working on. I'm refreshed, ready and excited to get back to work!

TECHNICAL EXPERIENCE

FULL STACK SOFTWARE DEVELOPMENT ENGINEER

Containn Inc. (Seattle, WA)   **03/2018-10/2018**

- Implemented new features, refactored existing code, fixed bugs on the front and back end for a startup developing a security API for application containers, mostly utilizing Docker, JavaScript, Node, Express, Bootstrap, HTML and CSS in a Linux environment
- From my first assignment I had an immediate impact on front end performance by finding and removing hundreds of unnecessary ajax calls
- Made suggestions on refactors and helped determine which features should be focused on next
- Played important role in determining which departmental tools should be used

FULL STACK WEB DEVELOPMENT PROGRAM

Coding Dojo (Bellevue, WA)   **10/2016-02/2017**

- Completed an intense, immersive web development program which required 1000+ learning and development hours across 50+ web projects using HTML, CSS, Python, MEAN (MongoDB, Express.js, AngularJS and Node.js) and ASP.NET (C#) Core stacks and deployment in a Linux environment to AWS And Azure
- Program maintained a strong focus on MVC and similar design patterns
- Obtained Black Belts (95%-100%) on Python and MEAN stack final exams

SOFTWARE DEVELOPMENT ENGINEER IN TEST I

Microsoft Corporation (Redmond, WA)   **06/2015-12/2015**

- Identified need for tools to assist in data transform process and obtained sign-off to assume development responsibilities for these tools
- Wrote tools in PowerShell and VBScript to take telemetry data from an unconstrained Excel data source and cleaned it up for insertion into the Cosmos database
- My proactive response allowed other developers to go from behind, to ahead of, schedule for project completion

SOFTWARE TEST ENGINEER III

Microsoft Corporation (Redmond, WA)   **08/2011-04/2015**

- Software Test Engineer III on high profile Windows 10 and Windows 8 operating systems
- Developed new processes to facilitate seamless integration between merging test groups and trained new and existing personnel

EDUCATION, CERTIFICATIONS & TRAINING

Coding Dojo
Bellevue, Washington
